Market Commentary

Indian equity benchmarks showed a volte-face on Wednesday as what started on a promising note ended as a dismal show. The optimism in local markets petered out completely by the end of trade and the benchmarks drifted into the negative territory despite getting off to a gap-up opening. Sentiments remained subdued on the report that Global agency Fitch Ratings retained the 'BBB-' sovereign rating-the lowest investment grade-on India as weak public finances continue to constrain India's ratings. The rating agency said that India's sovereign ratings balance a strong medium-term growth outlook and favourable external balances with a weak fiscal position and difficult business environment. Further, many investors remained on the sidelines and refrained from any buying activity ahead of the US Federal Reserve's policy outcome, due later today. The Fed is widely expected to stand pat on interest rates, but the post meet statement of the Fed chair Janet Yellen may offer hints on the possibility of a rate hike in June.

On the global front, Asian equity markets ended mixed on Wednesday, as strong earnings and manufacturing data boosted risk appetite, while expectations that the Federal Reserve will signal a June rate increase later in the session kept investors on their toes. The US central bank is expected to hold rates steady amid signs of softening inflation, but its commentary will be scrutinized for new clues as to the Fed's views on the economy and interest rates.
