Market Commentary

Indian equity indices showcased a courageous performance and went on to outclass indices around the world by vivaciously rallying by close to a percent in the session and settled above the psychological 9,600 (Nifty) and 31,200 (Sensex) levels. Sentiments got a boost with report that the government has ramped up capital spending by nearly 60% in the first two months of the current financial year, in a bid to perk up investment sentiment and crowd in private investment. Early passage of the budget in March has allowed the government start spending from the beginning of the new financial year in April. In April-May, the government spent Rs 52,536 crore, 58% more than the year earlier period.

On the global front, Asian equity markets ended mostly higher on Monday as investors digested cheering economic news out of China and Japan. The survey of Chinese manufacturing from Caixin found output at a three-month high in June, while Japan's official 'tankan' snapshot of business sentiment showed levels of cheer at their highest for more than three years. Meanwhile, investors awaited cues from this week's G20 summit, the Wednesday release of Fed minutes and the US nonfarm payrolls report to be released on Friday. Meanwhile, European shares began the new quarter with solid gains, while the dollar lifted from nine-month lows as US Treasury yields hit their highest since mid-May.
