#### Market Commentary

Indian equity markets truly depicted the choppiness of F&O expiry session and settled with marginal cut on Thursday. Markets started the session on pessimistic note as sentiments remained downbeat on report that the country's investment climate during April-December period of this fiscal looks subdued with declining figures in announcements of new projects and the number of projects under execution. The value of investment in new projects during April-December was Rs 4.43 trillion, less than half of Rs 9.21 trillion in the comparable period of last fiscal. Traders also remained concerned on report that minutes from the Reserve Bank of India's meeting this month showed monetary policy committee members expressing concerns about accelerating inflation, although that was also tempered by uncertainty about the strength of an economic recovery. Some concerns also came with US Department of Agriculture (USDA) Chief's statement that the recently announced rise in minimum support price of agri commodities by the government is not the best way to increase farmers' income.

On the global front, European markets were trading in red terrain as a flurry of corporate results failed to lift sentiments. Britain's economy grew more slowly than first thought during the three months to December, raising questions about the economy's strength as the Bank of England prepares to raise interest rates. Asian markets ended mostly in red, as investors worried surging bond yields after the Fed's latest comments on the economy will test equity valuations.

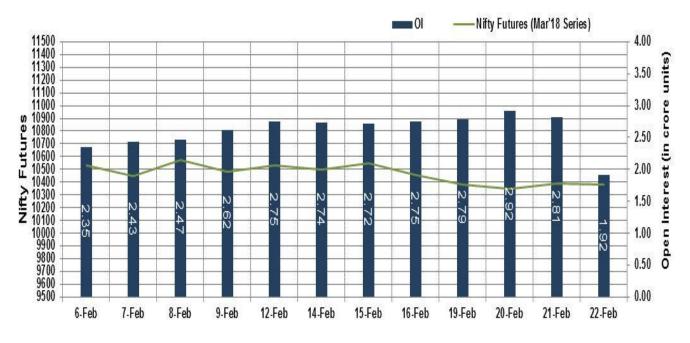

#### Market Turnover & FII Derivative Data

Market TO	Current	Previous	Net%
