#### Market Commentary

Monday turned-out to be a fabulous day of trade for Indian equity benchmarks with frontline gauges recapturing their crucial 10,200 (Nifty) and 33,200 (Sensex) levels, ahead of the RBI policy meeting on April 4-5, although the central bank is unlikely to raise rates despite increased risks to inflation posed by rising oil prices and a hike in minimum support price (MSP) announced in the Budget 2018. After making a mildly positive start, local bourses extended gains with State Bank of India's (SBI) research report Ecowrap stating that the Index of Industrial Production (IIP) may grow in the range of 8-9% in February and March 2018, with a healthy growth in SBI Composite Index, an indicator for tracking India's manufacturing activity. Traders also took some encouragement with Chief Economic Adviser Arvind Subramanian's statement that GST and demonetisation are done and India can now propel itself into a higher growth trajectory. Some optimism also came with Niti Aayog CEO Amitabh Kant's statement that India will reap benefits of the structural and institutional reforms in the next couple of years.

On the global front, Asian markets ended in red despite Chinese manufacturing activity expanded at its weakest pace in four months in March, as export demand faltered, prompting companies to shed staff more quickly as they looked to cut costs. The Caixin/Markit Manufacturing Purchasing Managers' index (PMI) fell to 51.0 in March from February's 51.6. The European markets remain closed on account of 'Easter Mondav' holidav.

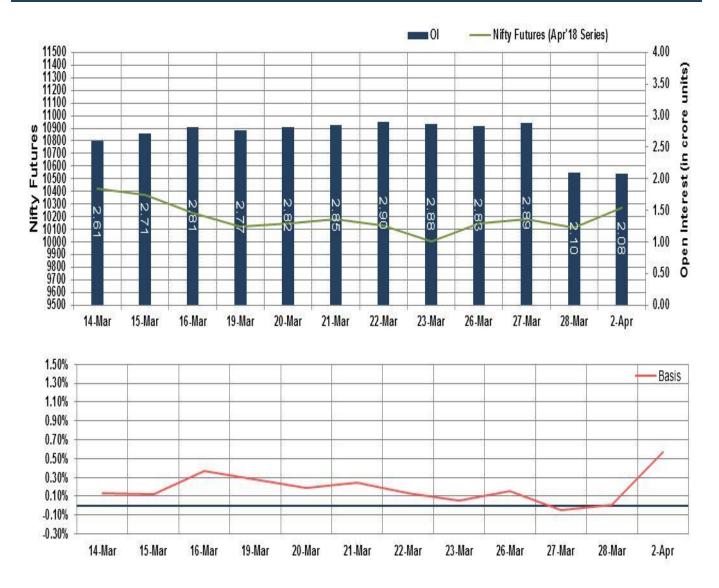

## Market Turnover & FII Derivative Data
