Market Commentary

Wednesday turned-out to be a horrendous day of trade for Indian equity benchmarks with frontline gauges ending below their crucial 36,000 (Sensex) and 10,900 (Nifty) levels. Markets started the session on pessimistic note as traders remained on sidelines ahead of the Reserve Bank of India's monetary policy review later this week and Services PMI data for the month of September to be released on October 4. Sentiments remained dampened with the government data showing that the growth of eight core sectors slowed to 4.2% in August, due to fall in output of crude oil, petroleum product and fertiliser. Besides, retail inflation for industrial workers rose to 5.61% in August from 2.52% in the year-ago month mainly due to r ise in prices of food items and petroleum products. Weakness in rupee, which slipped below 73 per dollar mark for the first time, too dampened sentiments. The Indian currency dropped to a record low in opening deals on Wednesday as a sharp rise in global crude oil prices over the last two sessions weighed on sentiment for the local unit.

On the global front, European markets were trading mostly in green after Italy's Prime Minister Giuseppe Conte said the euro was 'unrenounceable'. Further, concerns about Italy's budget plan also eased amid the buzz that the country plans to reduce its budget deficit to 2% in 2021. On the data front, Euro area producer price inflation slowed for the first time in four months during August.
