Market Commentary

After four days of losses, the equity benchmarks rebounded on Wednesday to end the trading session in green terrain, mirroring positive cues from European markets. The markets made a gap-up opening and remain firm for the most part of the session, as street got comfort with a report stating that government is responding well to the rising trade tensions between the world's two largest economies, maintaining a stance that serves the cause of Indian exporters best. Adding some optimism, Asian Development Bank's (ADB) latest report said that greenfield or new investments generated some 667,000 jobs in 2017-mainly in India, the PRC, Viet Nam, the Philippines, and Singapore-in real estate, software and information technology (IT) services, and electronic components, among others. Traders took note of the commerce ministry's statement that it is important to resume long-stalled talks for the proposed free trade agreement (FTA) between India and the European Union (EU) at the earliest and without any preconditions, in order to boost trade and investment.

On the global front, European markets were trading in green, despite Germany's producer prices rose at the fastest pace in a year in September. The figures from Destatis showed that producer prices grew 3.2% year-on-year in September, after rising 3.1% in the previous month. The street also overlooked reports that British factory orders dropped at the fastest pace in three years in the quarter to October as manufacturers remained worried about the possibility of a disorderly Brexit.
