#### Market Commentary

Indian equity benchmarks recovered most of their losses to end Tuesday's trading session on flat note, with Sensex and Nifty closing slightly lower. After a cautious start, key indices remained under a grip of bears during whole day, affected by India Meteorological Department's (IMD) statement that pre-monsoon rainfall from March to April has recorded 27% deficiency. The IMD recorded 43.3 millimetres of rainfall across the country from March 1 to April 24 as against the normal precipitation of 59.6 millimetres. Anxiety remained among investors, amid a report indicating that the decline in economic growth momentum in October-December quarter of FY19 is likely to continue. As per the report, subdued consumption demand and election related uncertainty is expected to weigh on India's industrial production.

On the global front, European markets were trading in red, as Eurozone economic sentiment weakened for a tenth straight month in April to its lowest level in nearly three years, amid a sharp deterioration in the morale in industry to its weakest level in about five years. The survey data from the European Commission showed that the economic sentiment index decreased to 104 from 105.6 in March. Asian markets ended higher, despite disappointing China's manufacturing data with both official and private surveys pointing to slower growth this month.
