	IDFC-LM and IDFC-LMP	To seek to provide high liquidity by investing in a portfolio of money market instruments and debt instrume Whilst the Scheme would endeavour to provide high liquidity to the investors, the surplus funds will be inve to deliver reasonable returns.						
	IDFC-CEF	To seek to generate long term capital growth from a diversified portfolio of predominantly equity and equity related instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized and the Scheme does not assure or guarantee any returns.						
	IDFC-PEF	To seek to generate long-term capital growth from an actively managed portfolio of predominantly equity and equity related instruments. The Scheme portfolio would acquire, inter alia, small and medium size businesses with good long term potential, which are available at cheap valuations. Such securities would be identified through disciplined fundamental research keeping in view medium to long-term trends in the business environment. The Scheme shall endeavor to accumulate long-term investor wealth by opening subscriptions to units during periods when stocks are available at reasonable valuations. By doing so, the fund managers would endeavour to prevent short-term money from flowing into the fund which can prove detrimental to the interests of long-term investors. As the Scheme would be sold to investors with a long-term investment horizon, it is also expected that the portfolio would remain relatively more insulated to day to day redemption pressures. The Scheme will close subscription, once it has collected a predetermined "manageable" corpus (approximate amount), which will be decided by the fund manager is of the opinion that investment opportunities have diminished. Thus the fund manager will endeavour to ensure that there are sufficient assets available to meet the long-term objectives of the Scheme.						
	IDFC-IEF	To seek to generate capital appreciation and / or provide income distribution from a portfolio of predominantly equity and equity related instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized.						
	IDFC-AF	To seek to generate capital appreciation and income by predominantly investing in arbitrage opportunities in the cash and the derivative segments of the equity markets and the arbitrage opportunities available within the derivative segment and by investing the balance in debt and money market instruments. There is no assurance or guarantee that the objectives of the Scheme will be realized.

### b) Income distribution tax

No income distribution tax is payable by the Fund, in respect of schemes in the nature of open ended equity oriented fund, in terms of Section 115R of the Act, which deals with tax on income distributable to unitholders of mutual funds.

For this purpose, "open ended equity oriented fund" is defined to mean, inter alia, a fund where the investible funds are invested by way of equity shares in domestic companies to the extent of more than 65 % of the total proceeds of such funds. The percentage of equity shares holdings of such fund is required to be computed with reference to the annual average of the monthly averages of the opening and closing figures.

The benefit of exemption from income distribution tax is available to both open ended and close ended equity oriented schemes.

In terms of Section 115R of the Act, where the income is distributed by a debt oriented fund, it is required to pay tax on income distributed by it, as under:

### c) Service tax

The Mutual Fund is liable for payment of service tax as recipient of services on various services availed by it. The rate of service tax is 12.36% (tax rate of 10% plus education cess @ 3% of the tax).

### (ii) To the unit holders

### a. Tax on income

In accordance with the provisions of Section 10(35)(a) of the Act, income received by all categories of unit holders in respect of units of the Fund will be exempt from income-tax in their hands. Exemption from income tax under Section 10(35) of the Act would, however, not apply to any income arising from the transfer of these units.

### b. Tax on capital gains

As per the provisions of Section 2(42A) of the Act, a unit of a Mutual Fund, held by the investor as a capital asset, is considered to be a short-term capital asset, if it is held for 12 months or less from the date of its acquisition by the unit holder. Accordingly, if the unit is held for a period of more than 12 months, it is treated as a long-term capital asset.

### Computation of capital gain

Capital gains on transfer of units will be computed after taking into account the cost of their acquisition. While calculating long- term capital gains, such cost will be indexed by using the cost inflation index notified by the Government of India.

### Long-term capital gains

Schemes in the nature of equity oriented fund

As per Section 10(38) of the Act, long-term capital gains arising from the sale of units of an equity oriented fund entered into in a recognised stock exchange or sale of such units of an equity oriented fund to the mutual fund would be exempt from income-tax provided such transaction of sale is chargeable to securities transaction tax.

Companies are required to include such long term capital gains in computing the book profits and minimum alternated tax liability under Section 115JB of the Act.

### Schemes other than equity oriented fund

In respect of schemes other then equity oriented funds, the tax implications are as follows:

(i) As per Section 112 of the Act, long-term capital gains on transfer of units are liable to tax at the rate of 20%. Income tax on long-term capital gains on transfer of units shall, however, be limited to 10% of the gains computed without the benefit of cost indexation.

Further, in case of individuals/ HUFs, being residents, where the total income excluding long-term capital gains is below the maximum amount not chargeable to tax<sup>1</sup>, then the difference between the maximum amount not chargeable to tax and total income excluding long-term capital gains, shall be adjusted from long-term capital gains. Therefore only the balance long term capital gains will be liable to income tax at the rate of 20% or 10%.

The tax as calculated above shall be increased by a surcharge as under:

Effective 1 April 2008, it is proposed that the maximum amount of total income, not chargeable to tax would be as under :

However, such gains shall be computed without the benefit of cost indexation.

In case of long-term capital gains on transfer of units arising to specified overseas financial organisations being persons other than companies, tax shall be chargeable at the effective tax rate of 11.33% (10% tax plus 10% surcharge<sup>3</sup> thereon plus additional surcharge of 3% by way of education cess on the tax plus surcharge).

However, surcharge is leviable on companies and firms if their total income is in excess of Rs 10,000,000.
