#### Market Commentary

Indian equity markets truly depicted the choppiness of F&O expiry session and ended the session slightly in red on Thursday. However, both Sensex & Nifty were up by over 2% during the December F&O series. Key gauges traded lackluster throughout the session and volatility which emerged in dying hour of trade mainly dragged the bourses lower on lingering concerns over government borrowing exceeding target. Cautiousness persisted in the markets throughout the session with the government decision to make additional borrowing of Rs 50,000 crore this fiscal through dated securities, a move that may put burden on the fiscal deficit target of 3.2 percent of GDP. At the same time, the government lowered its borrowing through short-term treasury bills by Rs 61,203 crore. This has made the task of exactly calculating the fiscal deficit a bit tedious exercise. However, losses remained capped, as traders took some solace with report that the capital markets regulator, Securities and Exchange Board of India (SEBI) is likely to ease entry norms for FPIs willing to invest in the Indian markets. It may ease some rules, including expanding the eligible jurisdictions for registration by including countries with diplomatic tie-ups with India.

On the global front, European markets were trading in red in early deals amid a light holiday-week of trade seen across markets worldwide. Asian markets ended mostly in green, as strong economic data from the region and in the US boosted confidence.

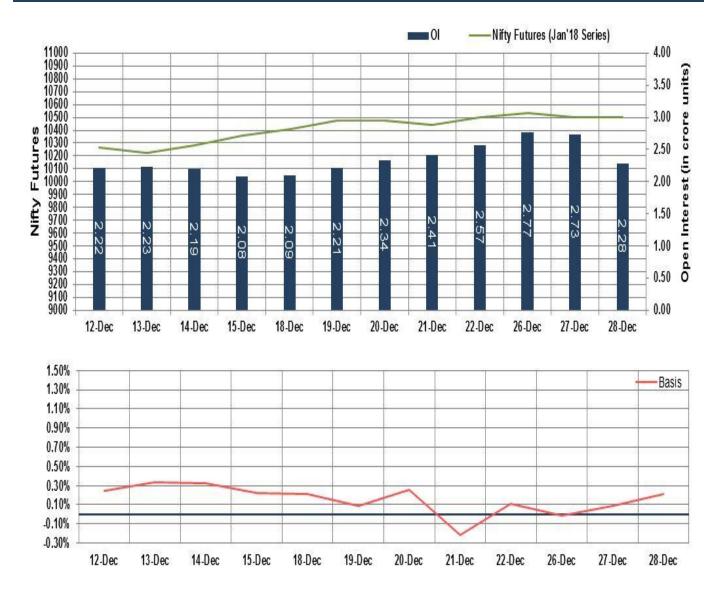

## Market Turnover & FII Derivative Data
