### Market Commentary

Indian equity benchmarks resumed northward journey after a day's break and ended in green terrain with frontline gauges recapturing their crucial 34,400 (Sensex) and 10,550 (Nifty) levels. Markets traded in green terrain throughout the session as traders took some encouragement with International Monetary Fund's (IMF) statement that the debt level is relatively high in India, but the authorities are planning to bring it down over the medium term with the right policies. In fiscal year 2017-18, India is planning to continue with the consolidation in the current fiscal year and over the medium term. Also, IMF in its Fiscal Monitor report titled 'Capitalising on Good times', said that India should now fully implement the new nationwide indirect tax to avoid tax revenue underperformance resulting in cuts to capital expenditures. Traders also took some support from a private poll which showed that India will claim the top spot among the world's fastest-growing major economies this year, but rising trade tensions between the United States and China may restrain that growth.

The recent tit-for-tat import tariffs imposed by the US and China have raised concerns about a full-fledged global trade war which could throw an otherwise-strong world economy off-course. The latest poll, taken April 11-18, predicted India's economy will expand 7.4 percent in the fiscal year that began this month.

## Market Turnover & FII Derivative Data

| Market TO | Current | Previous | Net% |
