Market Commentary

Key Indian equity markets ended the Monday's trading session with the notable losses of more than 0.40% each. The markets made a negative start of the week and remained bearish throughput the day, as the International Monetary Fund (IMF) warned governments to gear up for a possible economic storm as growth undershoots expectations. It said the bottom-line they see an economy that is growing more slowly than they had anticipated. Adding some worries among the traders, Economic Affairs Secretary Subhash Chandra Garg said that the country actually faces shortage of capital more than the scarcity of jobs. Domestic sentiments also got hit with a private report stating that India could lose a vital US trade concession, under which it enjoys zero tariffs on \$5.6 billion of exports to the United States, amid a widening dispute over its trade and investment policies.

On the global front, European markets were trading in green, as France's manufacturing output rebounded in December, rising 1.1%, after falling by a revised 1.5% in the preceding month. According to preliminary data from the statistical office INSEE, growth was driven by a 5.7% rise in the manufacture of coke and refined petroleum products, followed by a 2.6% climb in the production of transport equipment. Other manufacturing registered a 1.3% increase and the manufacture of food products and beverages grew 0.9%. Asian markets ended mostly in green, after China commerce ministry said that China's retailer and catering enterprises earned over 1 trillion yuan (\$\$201 billion) during the Lunar New Year holiday, defying an economic slump to rise 8.5 per cent from last year.
