Market Commentary

Last hour buying lifted Indian equity indices higher on Tuesday, with Sensex and Nifty closing above their crucial psychological levels of 38,900 and 11,650, respectively. After a cautious start, the markets remained volatile for most part of the session, as Industry body Internet and Mobile Association of India (IAMAI) said the draft e-commerce policy may be inimical to the government's efforts of building a trillion-dollar digital economy by 2022, and is likely to severely bring down FDI flows in the sector. The association was also of the view that the process of making the policy itself was less than inclusive and open as compared to recent national-level policies like the National Digital Communications Policy 2018. Traders were also pessimistic with a report that Indian economy may be moving towards a slowdown as the country has off-late witnessed a drop in several key economic indicators. After a fall in auto sales, a shortfall in collection of direct taxes among others, now household savings in the country too have declined.

On the global front, European markets were trading in green, as Dutch industrial production rose in February after falling in the previous two months. The Central Bureau of Statistics reported that industrial production rose 0.5 percent year-on-year in February, reversing a 0.6 percent fall in January. In December, production fell 4.3 percent. Besides, Hungary's exports and imports rose in February leading to an increase in the trade surplus. As per preliminary data from the Hungarian Central Statistical Office, the trade surplus grew by EUR 49 million year-on-year to EUR 891 million.
