Market Commentary

Indian equity bourses gave up their gains on Thursday to end the session flat. After a positive start, the markets traded firmly during morning deals, as the government data showed that foreign direct investment into India grew by 28 per cent to \$16.33 billion during the first quarter of the current fiscal. Inflow of FDI during April-June of 2018-19 stood at \$12.75 billion. Some support also came with reports that a top advisory body on external trade will meet next week to discuss issues related to export promotion, domestic manufacturing and competitiveness in the wake of a fall in exports of traditional, employment-generating sectors such as gems and jewellery, leather, handloom and cotton yarn and fabrics.

But in noon deals, key indices erased gains, as India Ratings and Research (Ind-Ra) believes India's increased dependence on foreign portfolio investment (FPI) makes the country highly vulnerable to global shocks. The surplus generated in the services trade combined with remittances is insufficient to cover India's trade deficit. Adding anxiety among market participants, domestic credit rating agency CRISIL cut India's current financial year (FY20) Gross domestic products (GDP) growth forecast to 6.3% from its earlier forecast of 6.9%. The agency said that lower GDP growth forecast corroborates that India's economic slowdown is deeper and more broad-based than suspected.
