Market Commentary

Indian equity bourses ended in red for yet another trading session. The start of the day was positive, amid report that the government has stayed with the borrowing plan for the fiscal, as announced in the budget, sending a strong signal that it will try and meet the fiscal deficit target despite a sharp cut in corporate tax rate that is expected to cost Rs 1.45 lakh crore. But, soon key indices turned volatile, as India's manufacturing activity remained unchanged in September 2019, hit by subdued demand conditions domestically and externally. As per the survey report, the Nikkei India Manufacturing Purchasing Managers' Index (PMI) was at 51.4 in September, unchanged from August.

On the global front, European markets were trading in red, as euro area manufacturing sector contracted at the fastest pace in nearly seven years as output, new orders and purchasing fell sharply in September. The final data from IHS Markit showed that the final manufacturing Purchasing Managers' Index dropped to 45.7 in September from 47.0 in August. Asian markets ended mostly in green, after South Korea's consumer prices declined for the first time on record in September and exports continued to fall, adding pressure on the central bank to ease monetary policy. Consumer prices fell 0.4 percent year-on-year in September after staying flat in August.
