

MORNING MANTRA

Daily Derivatives & Market Report

JUNE 08, 2022

Indian equity benchmarks ended lower on Wednesday's trading session. After a positive start, markets soon turned volatile, as the World Bank cut India's economic growth forecast for the current fiscal to 7.5 per cent as rising inflation, supply chain disruptions and geopolitical tensions taper recovery. This is the second time that the World Bank has revised its GDP growth forecast for India in the current fiscal 2022-23 (April 2022 to March 2023). In April, it had trimmed the forecast from 8.7 per cent to 8 per cent.

Despite volatility, markets managed to trade higher in late morning deals, after Reserve Bank of India's (RBI) Monetary Policy Committee has raised Repo Rate by 50 basis points (bps) to 4.90 per cent in its June bi-monthly meeting. Real GDP growth for FY 2022-23 is retained at 7.2%. Adding more relief among traders, the Reserve Bank of India (RBI) in its latest data has showed that Bank credit grew by 11.04 per cent to Rs 120.27 lakh crore and deposits up by 9.27 per cent to Rs 165.74 lakh crore in the fortnight ended May 20, 2022.

However, in the second half of the trading session, key indices turned red as RBI Governor Shaktikanta Das said the Ukraine-Russia war has led to globalisation of inflation and is posing new challenges, as the central bank upped the inflation projection to 6.7 per cent for current fiscal year. In April, RBI had projected retail inflation at 5.7 per cent for 2022-23. Traders failed to take support with Chief Economic Advisor (CEA) Anantha Nageswaran's statement that the impact of structural reforms, like GST and IBC, will help boost India's growth once the cloud of the pandemic and geopolitical conflict recedes.

On the global front, European markets were trading lower as investors prepare for the latest reading of U.S. inflation on Friday. Asian markets settled mostly higher on Wednesday, after a measure of the public assessment of the Japanese economy advanced in May. The survey data from the Cabinet Office showed that the current conditions index of the Economy Watchers' Survey, which measures the present situation of the economy, rose to 54.0 in May from 50.4 in April.

Back home, on the sectoral front, coal sector remained in focus, after Moody's Investors Service has said that large coal-importing nations, including India, will look to ramp up the output of domestic coal to strengthen energy security and lessen dependence on the import of fossil fuels. The government has recently mandated Coal India (CIL) to import coal as an emergency measure to avoid a shortage of coal for the country's power utilities and build up buffer stock.
