Daily Derivatives & Market Report

SEP 16, 2022

Indian equity benchmarks witnessed complete bloodbath on Friday on account of weak global cues amid fears of aggressive tightening by the Fed in the face of warnings of a global recession. Markets made a gap-down start amid concerns over the country's economic growth as India Ratings cut the forecast to 6.9 per cent from 7 per cent, joining other institutions who have cut their projections to below 7 per cent since the release of the April-June quarter GDP data. The agency expects the slowdown in the growth of government final consumption expenditure (GFCE) and worsening of net exports to weigh on the FY23 GDP growth. Moreover, the rating agency said that the current account deficit (CAD) may have reached a nine-year or 36-quarter high of 3.4 per cent of the gross domestic product (GDP) in the first quarter of this financial year against a surplus of 0.9 per cent a year ago. Some concern also came as Global Rating agency Moody's said India's rated infrastructure firms can largely withstand further depreciation in the value of rupee against US dollar due to financial hedges and other mitigants.

Markets extended losses to end near intraday lows as sentiments remained fragile as International Monetary Fund (IMF) stated that the global economic outlook remains downbeat and some countries are expected to slip into recession in 2023, but it is too early to say if there will be a widespread global recession. The IMF in July revised down global growth to 3.2% in 2022 and 2.9% in 2023. It will release a new outlook next month. Sentiments also remain dampened after the World Bank said the world could be heading towards a global recession in 2023 as central banks across the world simultaneously hike interest rates to combat persistent inflation. Traders overlooked Union Minister for Petroleum and Natural Gas Hardeep Singh Puri's statement that the country is on the path to becoming a 10 trillion-dollar economy in 2030 and the third largest economy in the world by 2047.

Global cues too remained daunting as Asian markets ended mostly in red, while European markets were trading mostly in red amid growing expectations of hawkish moves by the Federal Reserve and fears of a global recession. Back home, the Ministry of Corporate Affairs (MCA) has yet again revised the threshold limit for paid-up capital of small companies. Earlier, the definition of small companies under the Companies Act, 2013 was revised by increasing their thresholds for paid-up capital from not exceeding Rs 50 lakh to not exceeding Rs 2 crore and turnover from not exceeding Rs 2 crore to not exceeding Rs 20 crore. On the sectoral front, stocks related to information technology space edged lower amid the selloff in global equities after the release of the US inflation number for August triggered risk-off bets. Aviation industry stocks remained in focus as rating agency ICRA said domestic air passenger traffic rose 5 per cent to 1.02 crore in August and a fast-paced recovery in the traffic is expected this fiscal on the back of normalcy in flight operations and widening vaccination coverage.
