Daily Derivatives & Market Report

NOV 23, 2022

The Indian equity benchmarks extended their gains for second straight day. Indices made optimistic start, as traders got encouragement after Organisation for Economic Cooperation and Development (OECD), the Paris-based intergovernmental body that focuses on economic policy reports in its latest Economic Outlook said that India, with a growth rate of 6.6 per cent in this financial year, is set to be the second-fastest growing economy in the G20 in FY 2022-23 behind Saudi Arabia, despite decelerating global demand and the tightening of monetary policy to manage inflationary pressures. Some additional support also came with commerce and industry minister Piyush Goyal's statement that the proposed free trade agreement (FTA) between India and the UK is a high priority for both the countries and the next round of negotiations for the pact is slated to happen next month.

Markets cut some of their gains but managed to protect gains, as some comfort also came after Moody's Investors Service said the trend of gradual fiscal consolidation remains intact for India and going forward the country will see strong revenue performance and debt stabilisation. Traders took note of report that India has been ranked 8th on Climate Change Performance Index (CCPI, 2023) published by German Watch, New Climate Institute and Climate Action Network International based in Germany. The latest report of CCPI, released at COP 27 in November 2022, shows Denmark, Sweden, Chile and Morocco as the only four small countries that were ranked above India as 4th, 5th, 6th and 7th respectively.

Key gauges continued their firm trade in afternoon session amid reports that India is not only a bright spot amid looming uncertainty in the global economy with the forecast of a 6.1 per cent growth as compared to China's 4.4 per cent, European economies near 0.5 per cent and the US around 1 per cent next year. It is also fast emerging as one of the most important leaders of technological change, especially in the arena of digital technology and other frontier technologies. In late afternoon session, indices added more points to touch intraday high points amid investors were looking forward to the release of the Federal Reserve's meeting minutes. However, in last leg of trade, markets gave up some gains and came off from intraday high points amid profit booking.

On the global front, European markets were trading mostly in green as investors assessed euro zone economic data and awaited the U.S. Federal Reserve's latest meeting minutes. Asian markets ended mostly in green tracking an overnight recovery in Wall Street as markets awaited more cues on U.S. monetary policy, although rising COVID-19 cases in China kept gains limited as traders feared more disruptions. Back home, in scrip specific development, Inox Green Energy Services has debuted at Rs 60.50 on the BSE, down by 4.5 points or 6.92% from its issue price of Rs 65.
