Daily Derivatives & Market Report

DEC 22, 2022

Indian equity benchmarks witnessed a fall for yet another day on Thursday, with both Sensex and Nifty ending in red, amid fears emanating from a sharp rise in cases of coronavirus in many countries. Markets made a positive start of the day, as sentiments were optimistic with former Niti Aayog vice chairman Arvind Panagariya's statement that the Indian economy is likely to grow at over 7 per cent in the current fiscal year, and observed that the growth rate should sustain next year too provided the forthcoming Budget does not have any negative surprises. Besides, Minister of State in the Ministry of Commerce and Industry, Anupriya Patel has said that the bilateral Trade between India and the Gulf Cooperation Council (GCC) grew from \$87.35 billion in FY 2020-21 to \$154.66 billion in FY 2021-22, registering an increase of 77.06% on a year-on-year basis.

However, markets soon turned negative and remained lower till the end, as some concern came amid provisional data available on the NSE showing that foreign institutional investors (FIIs) sold shares worth Rs 1,119.11 crore on December 21. Traders were cautious, as in a tightening cycle, a premature pause in monetary policy action would be a costly policy error, Reserve Bank Governor Shaktikanta Das opined while voting along with five other members of the MPC for raising the key lending rate by 35 basis points earlier this month. Besides, Finance Minister Nirmala Sitharaman said the government is keeping an eye on inflation which is purely extraneous nowadays because of fuel and fertiliser prices. Adding more worries, a CAG audit report on Direct Taxes drew attention to 57 instances of significant errors and irregularities in corporation tax assessments of high value cases involving tax effects of Rs 6,304.56 crore.

On the global front, European markets were trading mostly in green as the US consumer confidence rebounded in December, and the dollar regained stability after the Bank of Japan rocked markets with a surprise decision to loosen its grip on government bond yields. Asian markets settled mostly in green on Thursday, after producer prices in South Korea were down 0.2 percent on month in November. That follows the 0.5 percent increase in October. Among the individual components, prices for agricultural, forestry and marine products dropped 3.2 percent on month, while manufacturing products eased 0.2 percent, utilities dipped 0.1 percent and services were flat.

Back home, the auto components industry stocks were in focus as the Automotive Component Manufacturers Association of India said India's auto components industry witnessed a 34.8 per cent growth to Rs 2.65 lakh crore in first-half of 2022-23, riding on domestic demand, particularly from the passenger vehicles segment. Besides, stocks related to the steel industry remained in watch with the rating agency ICRA's report stating that the demand for finished steel in India is expected to grow 8 per cent in 2022 as compared to 2021. It said supported by the government's infrastructure-led growth model, domestic finished steel demand has registered a double-digit growth of 11.9 per cent in the first eight months of the current fiscal.
